SUBJECT INDEX

Acoustic measurements 7–9, 39
Algae, marine; metabolites 217–24
Aquaculture
  food chain 202
  prey organisms 203
Atlantic water flow, Gibraltar Strait 1–103

Bacteria
  cadmium accumulation 183–5
  cadmium uptake 181–7
  density changes 139–45
  direct and viable counts 152, 153
  enumeration 153, 172–4
  eutrophication 172–4
  growth rates 125
  methylotrophic 120
  numerical taxonomy 154
  stratified water 139–45
  synergistic communities 121
  trophic roles 117–25
Bacterial communities
  heterotrophic activity 151, 152
  pollution in Mediterranean 147–56
  sampling 149
Bacterial concentration 149
  and activity 150
Biocorrosion role 124

Cadmium
  bacterial accumulation 182–5
    concentration 186
    oxygen 185
    rate 186, 187
  bacterial uptake 181–7
Changjiang River
  dynamic topography 398
  hydrographic features of current 387–400
  map 388
  residual currents behaviour 396–9
  residual currents structure 392, 396, 397
  salinity distribution 388–91
  temperature distribution 388, 392, 393
  temperature, salinity 391, 394, 395
Chlorophyta metabolites 219, 220
CTD profiler 6, 7, 39
Current meter
  characteristics 527
  diagrams 529
  energy spectra 534, 535
  intercomparison 525, 532, 534
    site 526
  senses 530
  stick diagrams 531
  vector diagrams 533

Current meter moorings
  beacon 324
  cut sections 332–8
    aramid fiber 335–40
    nylon 335, 336, 339
    rope type 335–8
  deployment, Tsushima Island 319
  design 327
  failures 319–27
    description 321–4
  flag 325
  recovered rope 331
  scheme 528
  shearing and cut ropes 329–41
  sites 320
  tension record 330
Current oscillations
  near inertial, Korea 241–52
    meter stations 242
    temperature and salinity 243
    time variation 247–9
  rotary spectral analysis 244–7
  vertical phase analysis 244–7
  visual inspection 243–5
Current velocity, Japan Sea
  data analysis 228–33
  energy spectra 237
    kinetic 233, 234
  observation sites 229
  sea level, low pass filtered 235
  seasonal change 272, 273
  shelfwave evaluation 239
  subtidal frequency fluctuations 227–40
Cyanobacteria metabolites 218, 219

Diel variation, bacterial density 141–3
Dinoflagellate metabolites 217–19
Dissimilatory processes 119
Double diffusive sinking 255–66
  geothermal activity 255
    hydrographic features 262–4
    location, Japan 257
    measurements 256–8
  temperature profile 258–60, 265
  temperature, salinity and density 266

East China Sea
  Eulerian residual flows 423, 424
  M_2 tidal currents 431–9
  measurement status 432
  residual current modelling 417–28
  swell 441–55
  temperature section 433

East China Sea shelf edge
bathymetry 404
density profile 410, 411
hodograph 412
hydrographic profiling 401–16
vehicle 403
M_2 tidal currents 433–8
salinity profile 406, 409, 411, 412
temperature profile 407, 408, 411, 412
water mass 402
Ecosystems
oxyclines 120
stable, stratified 117, 118
Etang de Berre
bacterial counts 171–4
characteristics 170
map 169
Eutrophicated environment
heterotrophic processes 159–64
organic mineralization 167–74
protocol 160
Rhone river plume 163
sampling site, Mediterranean 161, 162
Expendable profilers 6, 7, 39

Froude number calculation 12, 50, 51
Fungi, Mediterranean 189–98
algicolous 194, 195
on angiosperms 192–4
drift wood 191
habitat preference 194
lignicolous 196–8
mucilaginous appendage 196
species groups 190–2

Genovese, Professor Sebastiano
bibliography 109–16
In Memoriam 107, 108
Gibraltar Strait
Alboran Sea dense water 20–2, 85
Atlantic water flow 1–103
Camarinal Sill measurements 8, 46, 47
current vectors 17, 64, 65, 69
density contours 62, 63
pressure 18, 71
role 16–18
temperature profiles 18, 66, 67, 69, 71
chart 41
CTD profiles 44, 45
density structure 31, 103
friction 28–35
Froude number 12, 50, 51
internal reservoir, Spartel 14, 52–7
Tangier basin 15, 16, 58, 59
isopycnal slope 24, 53
maximal exchange 10, 49
Mediterranean water flow 1–103
mixing 28
moored instruments 6, 39, 43, 44
Richardson number profiles 29, 103
seasonal measurements 22–4
shear flow instability 29, 101
surface slicks 26, 86, 87
Tarifa narrows 18–20, 73–83
currents 19, 75, 76
density contours 19, 20, 77, 79, 81
temperature and velocity 19, 76
transects 18, 73
time dependent hydraulic response 32, 105
topography 11, 49
undular bores 26–8
Camarinal sill 27, 88, 89
current vectors 27, 91
mode 1 27, 92, 93, 95
mode 2 27, 28, 97
propagation 28, 98, 99
release and propagation 28, 98
westward 29, 100

Hydraulic exchange flows, two-layer 9–12
Hydrographic profiling, sliding vehicle 401–16

Inertial oscillations, Korea 241–52

Japan Sea
geothermal activity and temperature profiles 255–66
in and outflow volume transport 273–9
model 274
seasonal change 275–7
subtidal frequency fluctuations 227–40

Korea
East Sea, wintertime circulation 281–93
density sections 291, 292
model application 285–93
stream function 289
temperature modes 286, 288, 289
near-inertial current oscillations 241–52
Korea Strait 295–306
energy flux density 314
tidal current ellipses 311
tidal current modelling 307–18
model results 309–12
tidal current prediction 312–18
tidal stations 308
Kuroshio current
calculation, south of Japan 503–14
absolute velocity profile 508, 509
bathymetry 506
computation 505–9
computer results 509
density distribution 513
equations 503–5
horizontal velocity 510–12
Taiwan Strait in winter 469–70
Kuroshio current structure
calculations 343–59
computational region 346
computations 348–52
East China Sea 352
intrusion 413–15

eddies 358
equations 344–6
Taiwan warm current 357
velocity and depth 354–6
vertical velocity component 357

Lake Faro, parameters 131
microbial distribution 132

M_2 tidal currents
continental shelf 433–8
continental slope 438, 439
East China Sea 431–9
harmonic analysis 433
Mariculture 201
Marine litter 177
collection 177–9
sample site, Naples 178
types 179
Marine snow, microbial abundance and density 143
Mediterranean water
flow through Gibraltar Strait 1–103
fungi 189–98
Microalgae
culture 208, 209
immobilization 211, 212
production from 207–12
utilization 211, 212
Microbial food assemblages 201, 202
predator–prey relationship 204
Microplankton network 159
Mineralization
organic material 167–74
sampling map 169
Mixed layer thickness and wave height 466
Mixotropic cometabolism 122–4
Model
mixed layer depth 464
ocean 270, 271
residual current, East China Sea 417–28
difference grid 420
error distribution 422
Eulerian residual flows 423, 424
numerical 418
tidal output 418, 419
tidal currents, Korea Strait 307–13
two-layered and volume transport 274
variational inverse 281–93
dynamic constraints 283, 284
numerics 284, 285

Negative food chain 204, 205
Northeastern flowing current, China coast 363–72
current speeds 368–70
components 371
vertical structure 369, 370
monitoring stations 365
motion equation 364
sea surface elevations 366
wind stress 367, 368

Osumi Strait
bedform distribution 519, 520
ocean generated sedimentary facies 515–24
sediment diagram 523
sediment transformation 520–2
surface sediment 517
mean diameter 518
mineral 518
topography 516
Oxic–anoxic microparticulates 121, 122

Phaeophyta metabolites 219–21
Picophytoplankton
C-assimilation 136
chlorophyll *a* autotrophs 135
definition 129
determinations 130
distribution 129–37
groups 134
physico-chemical parameters 130, 131
vertical distribution 132
Plasmid screening 155
Pollution, Mediterranean Sea bacteria 147–56

Residual current
East China Sea 417–28
generation 425–7
Huanghai Sea 428
tide-induced 427
Rhodophyta metabolites 222–4
Rotary spectral analysis 244–7

Seas east of China
bottom topography 442
definition 441
swell propagation 441–54
Sedimentary facies, Osumi Strait 515–24
Snell's law 443
South China Seas
current system 494
fine structure 497
salinity distribution 495–500
temperature and depth 494, 495, 498–500
Swell propagation
characteristics 444–50
incident angle 445–9
isobath 443
seas east of China 441–55
typhoon 450–5
Synergistic consortia 118–21

Taiwan
sea surface temperature 463, 464
sea water temperature variation 457–67

Taiwan Strait
geopotential anomaly 489
hydrography, winter 471
isohalines 472–7
isopycnal 472–7
isotherms 472–7
low-passed currents 482, 484, 487
low-passed water temperature 484, 487
low-passed wind field 483
moored instruments 480–6
progressive vector diagram 480, 481
sea surface temperature 470
temperature–salinity diagram 478
Temperature variation, seawater
and atmospheric temperature 465
depth 458, 459
east of Taiwan 457–67
station location 460–2
Tsushima Current Water 295–306
autumn distribution 297
CTD stations 296
distribution 295
temperature 297
temperature–salinity 298–305
Typhoon, swell generation 450–5

Underwater sliding vehicle 401
scheme 403

Wave propagation, shallow water 442–4

Yangtze brackish water
analysis 377–81
characteristics 373–5
circulation model 375–7
density gradient 380
plume 373–85
salinity diffusion 381
surface salinity and season 384, 385
surface velocity and season 382, 383

Printed in Great Britain by BPCC Wheatons Ltd, Exeter
